

AMERICAN CANOE MEN.

ANNUAL MEET OF THE ASSOCIATION ON LAKE CHAMPLAIN.

A PROSPEROUS CONDITION OF AFFAIRS—CRUISE ON LAKE CHAMPLAIN—PLACES THAT ARE WORTHY OF A VISIT EITHER BECAUSE OF NATURAL BEAUTY OR HISTORIC INTEREST.

Willborough Point, Lake Champlain, Aug. 5.—The American Canoe Association is an international organization, having a membership of over 2,500 canoeists, and comprising four sectional divisions, i. e., the Northern Division, including all of Canada; the Eastern Division, all of New England; the Atlantic Division, the boats of the middle Atlantic rivers with their seaboard, and the Central Division, the rest of the United States. Any amateur canoeist over eighteen years of age is eligible and invited to join the membership. The association, with its constantly growing membership and widening influence, affords increasing fraternal benefit and moral force. It promotes the interests of canoeists, especially in the direction of paddling and sailing for pleasure, and also by holding meetings for camping and sailing, affording facilities for obtaining information through its libraries and official organs as to routes, hotels, etc., for cruising purposes, and in regard to canoe and sail design. The annual general association meet, as well as the division meets, bring together members from all parts of North America, in friendly intercourse and competition, forming a source of great pleasure and enjoyment.

The association provides a code of rules for the supervision of paddling and sailing races, and through its influence keeps its branch of sport free from the slightest taint of professionalism. Over forty members of the association are at work as officers or upon the general and division committees without compensation; indeed, usually at considerable personal expense.

The St. Lawrence basin is one great network of lakes and rivers. In the common atlas, which do not devote many large-scale maps to the United States or Canada, only the great lakes are shown. The St. Lawrence basin is a vast expanse of water, with many smaller lakes and rivers, all of which are connected by a network of waterways. The basin is bounded by the Canadian mountains to the north and west, and by the Appalachian mountains to the south and east. The water flows from the north and west towards the south and east, eventually emptying into the Atlantic Ocean. The basin is a great source of power, and has been the site of many large-scale engineering projects, including the construction of dams and canals. The basin is also a great source of food, and has been the site of many large-scale fishing operations. The basin is a great source of recreation, and has been the site of many large-scale sporting events. The basin is a great source of life, and has been the site of many large-scale scientific studies.

The club pennant.

There is a marked improvement in the arrangement of the camp this year. The headquarters tent has been pitched at the fence corner on the east of the main camp of last year, on the site of the Eastern C. C. tent, the commodious, secretaries and signal officers' tents being pitched here, with the private tents of those and other officers in the rear. A landing has been built in front of these tents, while a larger dock than that of last year has been built south of the former site, substantial enough to permit large steamers to land. The little grove in which the Brown University men camped last year is cleared of underbrush and used as a general rendezvous, just in front of headquarters, and the pretty point to the west where Mr. Huntington's tent stood is to be kept open. The large open space on the hillside between the old and new headquarters will be kept free of tents, the desire of the site committee being to have the main camp as large and compact as possible in the ample space within and behind the grove on Indian Bay. The ladies' camp remains as before, but extends further toward the end of the Point, as it promises to be much larger. The new location of headquarters places it between the main camp and the ladies' camp, accessible from the latter without passing through the former. The water is much higher than it was last August, some twenty-five feet of the beach then exposed being covered. Though the level is certain to fall more or less, there is every probability that the extreme low stage of last year will not be reached.

The service both by water and by land has been vastly improved this year. The steamboat from the south ferries across to Burlington about 8 a. m.; and when she returns from the north, about 4:30 p. m., she also ferries to Burlington. A new station has been constructed, and a telephone office is maintained therein, on the mainland opposite Willborough Point. The ferries from Albany, stopping there, are leaving that city at 5:50 a. m. and 11:45 p. m. From the A. C. A. station passengers will be ferried over to the camp, about one mile; but canoes and baggage must go on Port Kent, and come back by the larger steamer.

The following members constitute the transportation committee: Chairman, I. V. Dorland, Arlington, N. J.; William Stuart Smith, captain of Rochester C. C.; Sidney Bishop, Bridgeport, Conn.; J. W. Sparrow, Trenton, Canada.

Charles Vischer Wine, the Commodore of the American Canoe Association this year, is a full-blooded Holland Dutchman from Albany. Mr. Wine is prominent in the social and military circles of his city. He has been an active canoeist for many years. His executive ability and his energy are a guarantee that, under his direction, the present meet of the association will be one long to be remembered.

William B. Wackerhagen, of Albany, is the secretary-treasurer of the association. He is an active business man of the capital city, one of the charter members of the National Canoe Association, and a member of the Albany Canoe Club. Mr. Wackerhagen was also in the committee to design purchase and draw conditions governing the sailing trophy of the A. C. A. His activity will make him one of the best secretaries that the association has ever had.

The cruise of the canoeist through this delightful lake is not complete unless he sweeps past Plattsburgh and goes to the northward to Rouses Point and then eastward among the islands to St. Albans. The navigation of Lake Champlain is a difficult matter, and the canoeist must be well acquainted with the lake and its surroundings. The lake is a great source of power, and has been the site of many large-scale engineering projects, including the construction of dams and canals. The lake is also a great source of food, and has been the site of many large-scale fishing operations. The lake is a great source of recreation, and has been the site of many large-scale sporting events. The lake is a great source of life, and has been the site of many large-scale scientific studies.

Many attractions at Eldorado.

The location of "Eldorado Through Canyons" is the most perfect of the spectacular, the chief features of which are the ruggedness of the cliffs, the return from Mecca, and the bombardment of Alexandria. All these scenes are given on a big scale. Incidental to the play are given El Dorado, a play of the same name, and a play of the same name. The play is a great source of power, and has been the site of many large-scale engineering projects, including the construction of dams and canals. The play is also a great source of food, and has been the site of many large-scale fishing operations. The play is a great source of recreation, and has been the site of many large-scale sporting events. The play is a great source of life, and has been the site of many large-scale scientific studies.

Comfort at the Grand Rockland.

The Grand Rockland Hotel is one of the most accessible resorts near the metropolis. Under the new management it is more popular than ever. Many prominent business men are there for the summer. They find it a most comfortable and convenient place to stay. The hotel is a great source of power, and has been the site of many large-scale engineering projects, including the construction of dams and canals. The hotel is also a great source of food, and has been the site of many large-scale fishing operations. The hotel is a great source of recreation, and has been the site of many large-scale sporting events. The hotel is a great source of life, and has been the site of many large-scale scientific studies.

Departure of Consul Cyrus W. Field.

Cyrus W. Field, the newly-appointed United States Consul at Brunswick, Germany, was one of the passengers by the Deutschland, which left New York last night, and is expected to arrive at Brunswick on Monday. Mr. Field will go from Antwerp to his post, which is at the entrance to the Harz Mountains, and is a favorite stopping-place for tourists. Reuben B. Andrews, of this city, who is to be his assistant, accompanied him. A number of Mr. Field's friends were at the pier to say good-bye, and many telegrams from Washington friends wishing good-bye were received.

The news of Chesop's death confirmed.

The Venezuelan Consul-General confirmed yesterday the news of General Chesop's death. No official report of his death has been received at the consulate. The cause of his death was the wetting he received in his flight after his last battle. While retreating he had to ford a river, and then was obliged to remain in the water for twenty-four hours. General Chesop had been a sufferer for some time with a disease of the kidneys, which had undermined a naturally strong constitution. His death took place in San Juan de los Rios, a city about twenty-four leagues from Caracas.

General Mordena has pursued Caceres' forces, and on July 20 captured the towns of La Victoria and Villa de Cura, without firing a shot. Lopez is now likely to follow.

A CROWDED WEEK OF GLORIOUS LIFE AT ASBURY PARK.

MANY INTERESTING SOCIAL EVENTS—ZIMMERMAN'S WELCOME HOME.

Asbury Park, N. J., Aug. 6 (Special).—The week, which has just ended, has been crowded full of interesting events. Outside of the scores of thousands of excursionists that left the hot cities for one day's cooling breezes by the sea, there have been many more features that rendered the week noteworthy. Monday and Tuesday evenings Miss Jones, commonly known as Black Patti, and Levy's band, under the leadership of the well-known conductor, Lewis Levy, delighted large audiences in the Auditorium by the beach.

There was a most delightful progressive euchre party at the Lake Avenue Hotel Tuesday evening as well as a big banquet at Zimmerman at the Coleman.

Wednesday evening was especially crowded; the boat-house annual carnival on Wesley Lake, which was more brilliant than ever, gazed at by over ten thousand; the complimentary banquet of C. K. Hall Post of the Grand Army of the Republic.

Charles Wood, who befriended General Grant in his time of need, the benefit for the Church of the Holy Spirit, under the management of William A. Brady.

Thursday evening the Asbury Park Wheelmen gave a bicycle lantern parade on the boardwalk, while at the same time "Bobby" Gaylor amused a large audience with his role of "Sport-All-American."

Yesterday afternoon and today occurred the greatest bicycle meet in the history of Asbury Park, as well as one of the most important held in this country this year.

"Amant Polly Bassett," old fashioned school drama, gave a good show last evening at Educational Hall.

Miss Anna E. Dickinson featured last evening in the Auditorium before an appreciative audience on "John Brown."

The complimentary banquet to Zimmerman, by the way, was the closing feature in one of the most remarkable receptions ever accorded an athlete in this country. The banquet was given by the Asbury Park George Smith, president of the local club, presided at the head of the table, which was shaped up a Z. On his right sat "Zimmo" and on his left Founder Bradley.

Mayor Stuart, of Philadelphia, sat near the champion. The Rev. Frank Colby welcomed "Zimmo" home, and then Mr. Smock called upon the following for toasts: The Rev. John Handley, Joseph McDermond, James A. Bradley, William K. Devereaux, and N. F. Loeb.

Colonel and Mrs. J. J. Barnes, of Washington, are at the hotel.

Mark Coffin, Assistant District Attorney of Albany, and his wife and family are Trenton guests.

Major Sprague, U. S. A., of West Point, is at the Trenton with his family.

M. B. Waters, general passenger agent of the Hudson River People's Line, is at the Coleman.

W. H. Barr, cashier of the Milton (Penn.) National Bank, is at the Hamilton.

Colonel J. J. Stullington, an eminent lawyer of Washington, is at the Lafayette.

John Kurney, of Lansing's ticket agency, New York, has his family at the Brighton.

Albert De Cerny, a paper manufacturer of Philadelphia, is recuperating at the hotel.

The Hon. David Martin, collector of the Port of Philadelphia, is stopping with his wife at the Brunswick.

W. H. Barrett, of Trenton, the author of a volume of poems, "Golden Rod," shortly to appear, is at the West End.

James E. Dunham, of the United States Glass Company, Pittsburgh, has brought his family to the Metropolitan.

J. A. Edwards, of the Wachman & Moon Manufacturing Company, is at the hotel.

Lake Champlain, N. Y., is a guest at the hotel.

L. H. Jones, the American manager for "The Illustrated London News," is at the Trenton.

Stanton Tamm, the Impresario of New York, is a guest at the Trenton.

Richard Young, a brother merchant of Syracuse, is at the Coleman.

J. H. Shellen, of the New York office of the Ocean Steamship Company, is at the Coleman.

L. K. Bingham, of Bingham Brothers Company, printers, 500 Broadway, New York, is at the Metropolitan.

E. J. Spangler, manufacturer of tags and envelopes in Philadelphia, has arrived at the Metropolitan with his family.

Dr. Nassau, a missionary of the Presbyterian Board for thirty years, spent the week here.

Edward H. Brooks, a manufacturer of tin and sheet metal in New York, is at the Brighton, with his wife and children.

Mrs. R. H. H. of West Park, was the winter of the year, and is at the hotel.
